

Load Wizard

The Load Wizard is a compact lightweight solution for jobs requiring up to 400kg lifting power. The installed Load Wizard occupies minimal deck space and provides great lifting power, mobility and ease of use.

Thanks to its single operator functionality, your driver/operator can now deliver and collect machinery and other small loads safely, efficiently and without injury.

Applications:

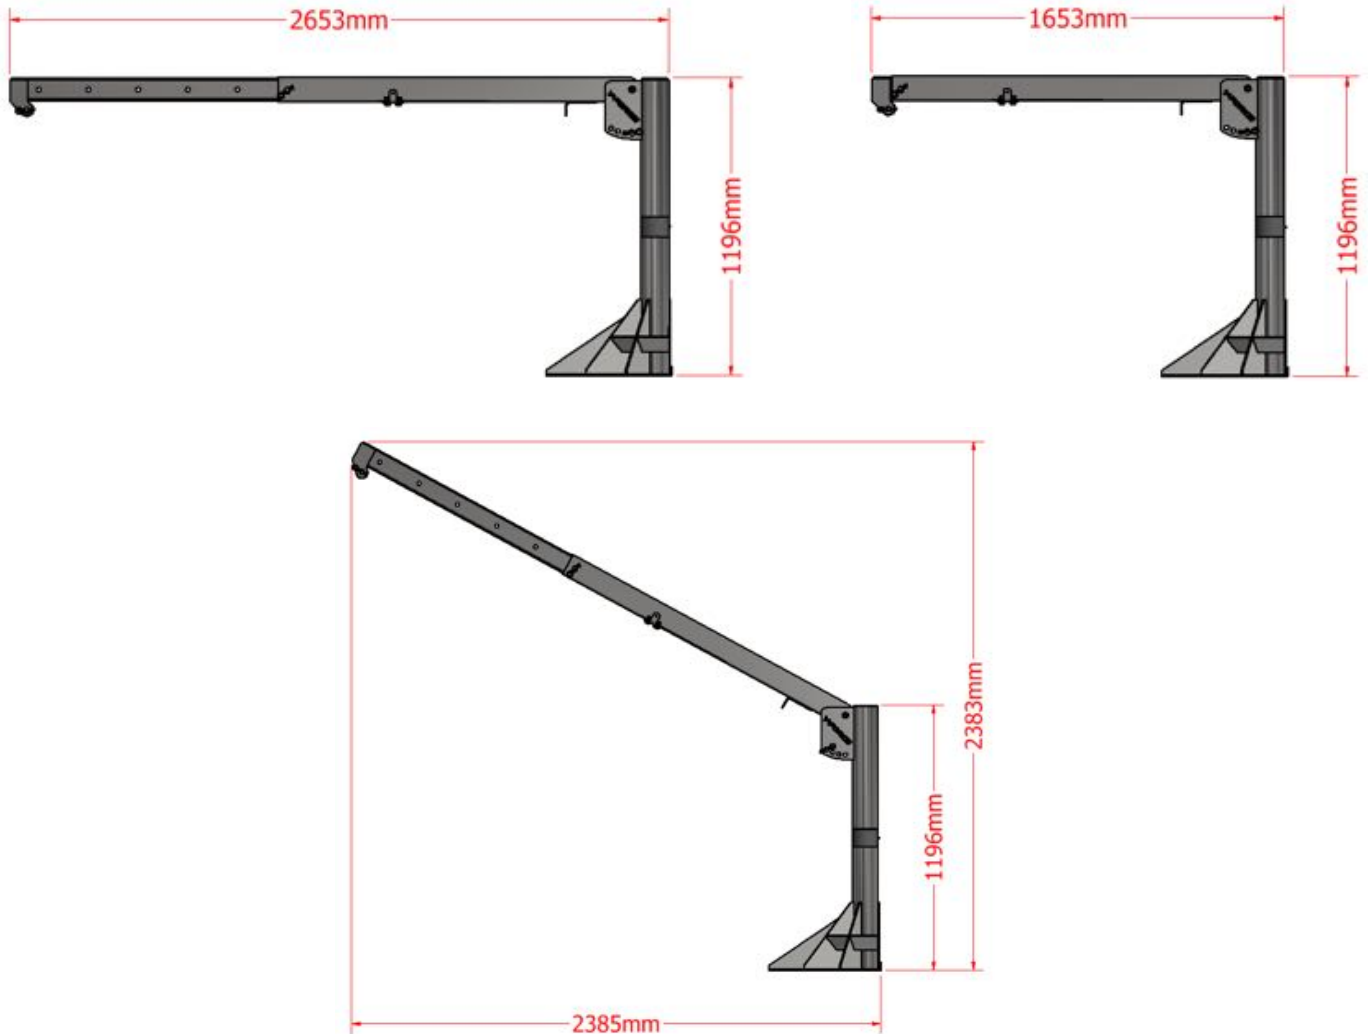

- Loading / Unloading of light equipment or materials onto/from small trucks

Features:

- Mast bearings fitted for easy swivel movement
- 12V remote controlled winch connected to the vehicle's battery
- Single-operator assisted operation
- Simple pin locking mechanism to extend and angle boom for reach and height adjustment
- Adjustable support leg with anti-slip foot for vehicle stability
- Heavy duty mast gusseting for lifting strength
- Various mounting holes in base plate for easy fitting to vehicle
- Fits Kia K2700, Hyundai H100 and other similar trucks
- Manufactured in South Africa with all spare parts locally available

Specifications	<ul style="list-style-type: none">• Max Winch lifting capacity: 1588 kg / 3500 lbs• Max lifting capacity with boom fully extended – 400kg recommended
Drive System	<ul style="list-style-type: none">• EWP3500 Electric Winch
Dimensions	Max outreach 2653 mm Height 1196 mm (boom horizontal), 2283mm (boom extended at highest point) Weight 118.2 kg + 10 kg winch = 128.2 kg
